PPHE's FY24 results (December year-end) are in line, with EBITDA of £136.5m, compared with "an EBITDA range of £136.0 million to £138.1 million" mentioned in last month's year-end update. Our forecast of £138.1m had been the top of the range. The outlook is reassuring saying that "the Board remains confident in delivering results in line with market expectations for 2025 and the longer-term opportunities ahead", adding that "forward booking momentum across all regions for Q2 and the remainder of the year is encouraging following a quieter Q1, the Group's slowest quarter in the financial year".

We have increased our forecast for FY25 EBITDA (where we had been the bottom of the range) by 0.5% and maintain it for FY26. We have raised our illustrative fair value by 6%, from £26.76 to £28.32 per share, mainly as the pipeline hotels are now becoming profitable. The EPRA NRV per share was £27.51, a 3% increase on the £26.72 of FY23, and includes art'otel London Hoxton for the first time. We think that Hoxton's valuation will rise further in coming years as trading stabilizes as valuations are based on DCFs.

- **The £300m+ pipeline** is on track, "these hotels are receiving excellent feedback from guests, are performing well and are on track to add at least £25 million of incremental EBITDA upon stabilisation of trading". Hoxton, the largest of the pipeline hotels, opened in April. The development of art'otel Rome, the last of the pipeline hotels, "continues as planned, with opening scheduled for 6 March 2025". The statement adds that "the Group continues to progress with several long-term investment opportunities to drive further shareholder value, as well as exploring other development opportunities on our land sites". We think PPHE has an opportunity to refurbish existing hotels, as it did recently with Berlin Kudamm, and to develop land sites, such as around its existing hotels and resorts in Croatia.
- **Valuation;** we believe that the Group's share price is cheap at £13.00 a 53% discount to the EPRA NRV of £27.51. Our illustrative fair value of £28.32, which is based on a four-stage Sum of the Parts (SOTP) model, is 3% higher than the EPRA NRV mainly as we incorporate assets which are not included in it; the management platform and two undeveloped land sites (New York and London Waterloo). We set out our SOTP at the end.

YE Dec, £m	Revenue	EBITDA	EPS (p) ¹	Div (p)	Net Debt	EPRA NRV (£)	PER ¹	Yield %

FY results - key additional points

- **Revenue** rose by 6.8% on a reported basis and by 3.3% on a LFL basis and we think this growth is impressive given that PPHE had a strong comparative in 2023, the initial bounce in post-Covid travel has probably passed, the macro-environment has been tough and a weaker Euro (c.40% of revenue) took off around 1% of growth. The LFL figures exclude the openings of Hoxton and Zagreb for the first 10 months of FY24. LFL revenue growth was 11.0% in Q1, 0.2% in Q2, 1.8% in Q3 and 3.6% in Q4.
- **Regionally**, the statement says that “In the UK, The Netherlands and in Germany in particular, occupancy continued to build whilst room rates moderated as anticipated. In Croatia, the Group’s portfolio performed well during July and August, the peak trading months”. We note that the UK (PPHE’s largest country at 57% of revenues) had a particularly strong comparator due to the Coronation of King Charles III in 2023 which boosted visitors to PPHE’s central London hotels.
- **RevPAR** (revenue per available room), calculated by multiplying average room rate by occupancy rate, rose by 1.0% on a LFL basis, from £120.7 to £122.0. LFL RevPAR rose by 3.3% in Q1, declined by 2.2% in Q2, rose by 2.3% in Q3 and rose by 2.5% in Q4. Across the year, RevPAR growth was led by growth in occupancy.
- **Occupancy**, continued to increase on a LFL basis, from 72.4% to 75.8%, a 4.7% proportional increase, and rose in all regions. LFL occupancy rose proportionally by 6.6% in Q1, by 2.5% in Q2 and by 5.2% in Q3 and we estimate a 5.1% increase in Q4. We note that initially after Covid, the Group prioritised rates over occupancy, partly due to higher costs, but more recently has focussed on increasing occupancy.
- **Average room rate**, in contrast, declined by 3.6%, on a LFL basis, from £166.8 to £160.8 due to the “increased weighting towards corporate travel”, after what had been a largely leisure driven performance of 2023. LFL average room rate declined by 3.0% in Q1, by 4.7% in Q2 and by 2.7% in Q3 and we estimate a 3.3% decline in Q4.
- **EBITDA**, on a LFL basis, rose by 8.7% and after a 10.9% rise in H1 we calculate a 7.4% rise in H2, with the margin increasing from 30.9% in FY23 to 32.5% in FY24, “supported by a strong focus on cost management and technological initiatives”. On a reported basis, the margin declined from 30.9% to 30.8% as new openings are typically margin dilutive in the first few months.
- **The dividend per share** increased by 5.6%, from 36p to 38p, in line with the Group’s progressive dividend policy. We also note that PPHE completed a share buyback of £7.8m in 2024.

Below, we include a table of the Group’s recent quarterly figures on a reported basis. PPHE provides the quarterly figures for Q1, Q2 and Q3 but only gives the annual figure at year end so we calculate the figures for Q4 which as a result may not be exactly correct (Figure 1).

Source: Company, h2Radnor

The statement references “an EBITDA range of £147.3 million to £158.6 million”. Our FY25 forecast was the bottom of the range at £147.3m and we have increased this by 0.5% to £148.0m, mainly due to a better assumption for occupancy (Figure 2). We have maintained our FY26 EBITDA forecast and introduced a FY27 forecast for the first time. Mainly due to changed assumptions for interest and tax we have increased our adjusted EPRA earnings per share forecast by 5.8% for FY25 but reduced it by 8.5% for FY26.

In FY25, we think that PPHE will benefit from a late Easter boosting occupancy, especially from leisure travelers who are typically higher yield than corporate travelers. Easter Sunday in 2025 is April 20th, the latest since 2019, whereas Easter Sunday in 2024 was on March 31st, the earliest since 2016. However, in the UK the Group will have to absorb higher labour costs given both the increase in the National Living Wage and Employer’s National Insurance contributions.

PPHE valuation

Sum of the parts valuation

Our illustrative equity fair value of £28.32 per share is based on a four-stage SOTP model, using an EV of £2,320m and an equity value to PPHE shareholders of £1,203m (Figure 3).

Figure 3: SOTP valuation of PPHE

Stage 1 – DCF of the core

The main value, accounting for 73% of the EV within our SOTP, is a DCF of the core existing hotels and resorts portfolio at £1,702m (Figure 4). As a base, we use our P&L forecast of £148m of EBITDA in FY25, removing the £10m profit we forecast for the development pipeline and removing the £12m for the management platform as we model these two separately. Our terminal growth rate is 0.5%.

Figure 4: DCF of PPHE's core portfolio (£m)

Stage 2 – DCF of the development pipeline

We have a separate DCF value for the development pipeline worth £430m, comprising 19% of the EV within our SOTP (Figure 7). The Group has said that post the opening of the four new hotels trading will stabilise at least £25m of EBITDA. Given that these will be new hotels, we model a higher revenue growth rate and margin progression than for the core portfolio DCF. We use the same WACC and terminal growth rate as for the core portfolio DCF.

Figure 7: DCF of PPHE's development pipeline (£m)

Source: Company, h2Radnor

Stage 3 – multiple of the management platform

The third stage of our SOTP, is to value PPHE's management platform and this accounts for 5% of our EV (Figure 8). In an extreme example, if the Group sold all of its portfolio under existing management agreements it would still have a management platform, managing all

hotels and resorts without owning them. The EPRA NRV does not account for the management platform as it only values the owned assets and the development pipeline.

We assume that the management platform will generate £12m of EBITDA in FY25, which we remove from our core DCF. We use 9.0x EV/EBITDA, which is the median valuation of the hotel peer group we have chosen for PPHE, which generates a value of £108m.

Figure 8: Multiple valuation of PPHE’s management platform

Operating company	FY25E
Revenue (£m)	30.0
EBITDA (£m)	12.0
Margin (%)	40.0
EV/EBITDA (x)	9.0
EV (£m)	108

Source: Company, Radnor

Stage 4 – Other assets

The fourth stage of our SOTP, is to value four other assets; two assets which contribute below EBITDA and two land sites, which we add in at a collective £80m and this accounts for 3% of our EV (Figure 8).

The EPRA NRV does include the Income Units and two German JVs but not the New York or Waterloo sites.

- 1) the Income Units in Park Plaza County Hall London which PPHE owns, valued at £16m.
- 2) the fair value of PPHE’s part of the two German JVs, which had an EPRA NRV of £18m.
- 3) the New York site, bought at \$42m (£34m).
- 4) the Waterloo site, where planning permission has been given, bought at £12m.

Our ‘other assets’ does not include any value for three other potential developments set out below. Projects are included in the balance sheet at cost and will be valued once developed, and currently these three potential projects are all at nil albeit they could have value once developed.

- 1) the Group has planning permission to develop a 465-key hotel on the site adjacent to its Park Plaza London Park Royal property for which it is designing plans.
- 2) the Group has planning permission for a new 179-room hotel, converting 6.5k sqm of subterranean space within the Park Plaza Victoria property.
- 3) the Group could develop the land in Croatia currently occupied by campsites into more valuable hotels and resorts.

Figure 9: Value of PPHE's other assets

The Income Units in Park Plaza County Hall	16
The fair value of PPHE's part of the two German JVs	18
The New York site	34
The Waterloo site	12
Total	80

Source: Company, Radnor

For the net debt of the core, we use our forecast net debt of £704m for FY25. For the minorities of the core, we use £267m as the EPRA NRV of the minorities was £317m and we reduce this by £50m which was the minority value ascribed to Hoxton when this development was announced in 2021.

The four hotels in the Group's development pipeline will all include minorities, with Belgrade at 48%, Hoxton at 49%, Rome at 49% and Zagreb at 48% and we use 49% overall. We take our DCF value for the development pipeline of £430m, then assume debt of £207m, which gives an equity value of £194m and we take 49% of this to generate a minority value of £109m (Figure 10).

Figure 10: Minority value of PPHE's development pipeline

Value	Amount (£m)
DCF of PPHE's development pipeline	430
Debt of the development pipeline	(207)
Equity value of pipeline	223
Minority	49%
Value of minorities	109

Source: Company, Radnor

Historically, PPHE has had low/no tax, partly reflecting its substantial capital allowances. Instead of deducting tax in our DCF, we deduct £36m in our SOTP, which is the deferred tax on revaluation of properties in the EPRA Net Disposal Value (NDV), which is effectively the tax that PPHE would pay upon portfolio sale.
